S+ $\frac{1}{2}$ reminds of printing press

Impression of large open, windswept area with water nearby.
Large flat hard surface area "like" airfield sort of place. Structure
heavily; one is metal tank, w/angle unit. Other bldgs heavily,
one of interest. Inside its dark light, cool, warm, and has at
least one room that is lighted, has a "folding thing" in it &
a surface that is "like" a desk or table for spreading flags
out on which has paper on it right now.

54½ impression that "things" come "in" from direction +
 be changed into more useable form - not fundamentally
 altered, just made "better" for purpose. "Like"
 analog signal coming in, being digitized, than being
 sent on in a more transmittable, useable
 format. Sense of linking or connection
 or being connected over wide area involves
 numerous different "outports" with people. Like a
 "network"

Civilized and aged terrace

woods, hills, open areas, roads, buildings, houses
cold, winds, cloudy, fresh smells, busy; high land with
intermittent water

4/2 "Document" doesn't seem to belong to whom it used to. 2nd party now has it. Seems almost ~~as~~ a report of something that was being or is being done/producted elsewhere. E/Seoul is somewhere along ways over own lots of water & land. "File" almost on stroke side of the globe, in a relatively hard to access place. It's almost as if someone has saved some sort of coup by having this document/info in their possession.
